

PROVIDE FEEDBACK

Your input is valuable to the City of Lake Forest Park in selecting stormwater actions for the City's SMAP. We'd like you to share your concerns, help prioritize what locations are addressed first, and shape the actions that will be taken.

We'd like to hear your feedback on the following:

- Which stormwater management actions would you like to see
- Report areas of drainage issues
- Suggestions for conservation
- Concerns about pollution

PROVIDE COMMENTS

- To fill out our survey, visit [station 7](#).
- To provide geographically specific comments, visit our [Public Input Map at station 8](#), where you can drop pins on a map to provide feedback to the City. This map is also searchable by address.
